

JOSSEF CHOHA

PROFESSIONAL SUMMARY

I am a dedicated and innovative IT professional, with a bachelor's degree in Information Technology and a strong interest in business applications, particularly in the Forex trading market. Through hands-on internships, freelance projects, and self-directed learning, I blend technical skills with business acumen to develop efficient digital solutions for business environments. After graduating in 2022, I focused on gaining practical experience through a short internship and subsequent freelance work on small-scale IT projects, such as basic web development and data automation tasks for local clients, while actively seeking full-time opportunities to build a stronger professional foundation.

WORK EXPERIENCE

Freelance IT Developer | 2023-Present

Handled small freelance projects for local businesses, including basic website maintenance, script automation for data processing, and simple Forex-related tool prototypes. Gained hands-on experience in client communication and project delivery, focusing on cost-effective solutions that incorporated business analytics to improve efficiency.

Business Consulting Firm, Dushanbe

IT Intern | 2022-2023 (6 months)

Assisted in developing and maintaining IT systems for business operations, including database management and software integration to support financial analysis. Applied basic programming skills to automate reporting tasks, incorporating business strategies learned from online courses to optimize processes and reduce manual efforts by 10%.

SIDE PROJECTS

Forex Trading Tracker App | 2023

Developed a simple web-based application using basic HTML, CSS, and JavaScript to simulate Forex market tracking, combining IT principles with business analytics for user-friendly trade monitoring.

Basic Website Portfolio | 2022

Created a personal portfolio website showcasing simple IT projects, utilizing free tools like WordPress to demonstrate web development basics.

Simple Data Analysis Script | 2021

Built a Python script for basic data processing and visualization, applying it to sample datasets to practice automation in everyday tasks.

Community IT Volunteer Project | 2020-2021

Led a small team to set up basic computer systems and provide IT training in a local community, applying foundational skills to secure resources and improve digital access.

ACADEMIC HISTORY

Bachelor of Information Technology

Tajik Technical University | 2018-2022

Final Year Project: "Development of a Basic Forex Trading Simulation Tool for Educational Purposes"

Lyceum of TNU | 2014-2018

High School Diploma (Mathematics and Physics)

CERTIFICATIONS
